**Feb 2021 - Present**

**Bachelor of Information Technology | Software Technology Major**

- **Relevant Courses:** Data Visualisation, Advanced Web Development, Software Development for Mobile Devices, Interface Design and Development, Cloud Computing Architecture, Object-Oriented Programming, Fundamentals of Data Management
- 

## TECHNICAL SKILLS

### Front-End Skills

React, NextJS, Angular, HTML, CSS, JavaScript, TypeScript, TailwindCSS, MaterialUI, etc...

### Back-End Skills

Firebase, MongoDB, SQL, NoSQL, RESTful API, .NET, AWS

### Software Development Skills

VS Code, Git, GitHub, GitFlow, Agile Methodology, npm, Vercel

---

## PROJECTS

**HealthDiary | Fitness and Health Tracker Web App**

- Developed a user-specific health tracking app to monitor and log daily health metrics and activities
- Implemented features that analyze user data to provide personalized health insights and trends
- Designed an intuitive interface for seamless entry and access, improving user engagement on mobile devices

**OpenHouse | Real Estate Property Management Web App**

- Created a platform for real estate agents to list, manage, and update property details efficiently
- Integrated tools for scheduling viewings, communicating with clients, and tracking inquiries to streamline the sales process
- Leveraged server-side rendering with Next.js to improve page load time and maintain user retention

**TechByte | Tech Product Based E-Commerce Website**

- Built an online store for tech products, enabling smooth browsing, purchasing, and order management
  - Implemented secure payment gateways, ensuring safe transactions and protecting customer data
  - Designed the platform with scalability in mind, supporting high traffic and future expansion
- 

## LANGUAGES

- **English:** Native Level
- **Japanese:** Conversational Level
